

Problema No 3.

a) 1er bucle

$$1. i = 1 \Rightarrow i = k = n/3 \quad \therefore O(n)$$

$$2. i = 2$$

$$3. i = 3$$

2do bucle

$$1. j = 1 \Rightarrow j = 1 + 4K = n \Rightarrow K = \frac{n}{4} - \frac{1}{4} \quad \therefore O(n)$$

$$2. j = 5$$

$$3. j = 9$$

$$4. j = 13$$

$$O(n) \cdot O(n) = O(n^2)$$
